

GoGymi Data Tables Description

Course ID Reference

course_id	Description
42	Langzeitgymnasium Math Long terme
3865	Kurzzeitgymnasium Math Court terme
5447	Langzeitgymnasium Essay
3301	Kurzzeitgymnasium Essay
2115	Langzeitgymnasium Text Comprehension (Sprachprüfung)
5009	Kurzzeitgymnasium Text Comprehension (Sprachprüfung)
1696	Student Intro (Deprecated) (Obsolète)
8117	Teacher Intro

1. Table Overview

File	Description
students.csv	Students registered in GoGymi, with group membership and optional study ID.
teachers.csv	Teachers registered in GoGymi, with group membership.
comments.csv	User comments on posts, with anonymised content.
course_ids.csv	Mapping of WordPress post IDs to course IDs and URLs.
pageviews.csv	Page-view log from the analytics database.

File	Description
events/*.csv	Decoded client-side interaction events (clicks, scrolls, media, etc.), split by type.
gymitrainer.csv	Full conversation threads with the AI chatbot (GymiTrainer).
gymitrainer_feedback.csv	User feedback (ratings & comments) on chatbot responses.
essay_results.csv	Essay submissions with the submitted text and per-dimension AI scores.
essay_feedback.csv	Teacher feedback and grades on essay submissions.
text_results.csv	Per-question results for text comprehension exams, including student answers and AI feedback.
text_questions.csv	Question bank for text comprehension exams.
math_results.csv	Per-question results for math exams (from the MongoDB math simulator).
math_questions.csv	Math exam metadata with per-question knowledge-component tags.
quiz_questions.csv	Question bank for LearnDash quizzes (HTML/LaTeX content).
quiz_results.csv	Per-question results for LearnDash quizzes.

2. User Schemas

students.csv

- **user_id**: Anonymised user identifier.
- **group_id**: Identifier of the group the student belongs to.
- **creation_time**: Unix timestamp of account creation (seconds).
- **study_id**: External study identifier extracted from the user's first name field (nullable; present for ~half the students).

teachers.csv

- **user_id**: Anonymised user identifier.
- **group_id**: Identifier of one of the groups the teacher has.
- **creation_time**: Unix timestamp of account creation (seconds).

Note: Both students and teachers can be in multiple groups in which case they have multiple rows. Students in the same group are physically in the same classroom.

3. Comments

comments.csv

- **comment_ID** (*index*): Unique comment identifier.
 - **timestamp**: Unix timestamp of the comment (seconds).
 - **user_id**: Anonymised user identifier.
 - **content**: Comment text (PII-redacted).
 - **post_id**: WordPress post the comment belongs to (see [course_ids.csv](#) for mapping).
 - **parent**: Parent comment ID for threaded replies (`null` if top-level).
-

4. Content Mapping

course_ids.csv

- **post_id** (*index*): WordPress post ID.
 - **url**: URL path of the post (e.g., [/themen/...](#), [/tests/...](#)).
 - **post_type**: One of [lesson](#), [quiz](#), or [exam](#).
 - **course_id**: The course this post belongs to (see Course ID Reference above).
-

5. Analytics & Events

pageviews.csv

- **id** (*index*): Pageview row ID from the analytics database.
- **url**: The page URL visited (see [course_ids.csv](#) for mapping).
- **user_id**: Anonymised user identifier.

- **created_at**: Datetime string of the pageview.

events/ directory

File	Type code	Description
events/c.csv	c	Click events
events/s.csv	s	Scroll / window-size snapshots
events/0.csv	0	Periodic activity heartbeats
events/q.csv	q	Question-view events
events/m.csv	m	Media playback events (audio, Vimeo, YouTube)
events/g.csv	g	GymiTrainer chatbot open/close events

events/c.csv — Click events

- **timestamp**: Client-side Unix timestamp (ms).
- **mouseX**, **mouseY**: Cursor position at click.
- **scrollY**: Vertical scroll offset.
- **buttons**: Mouse button bitmask see the MouseEvent.buttons property in JS.

events/s.csv — Scroll / window size

- **windowHeight**: Browser viewport height (px).
- **fullHeight**: Total document height (px).

events/0.csv — Periodic activity

- **timestamp**: Heartbeat timestamp (ms).
- **lastActivity**: Timestamp of most recent user interaction (ms).
- **mouseX**, **mouseY**: Cursor position.
- **scrollY**: Vertical scroll offset.

events/q.csv — Question views

- **timestamp**: When the question was viewed (ms).
- **questionNumber**: Index of the question shown.

events/m.csv — Media events

- **timestamp**: Event timestamp (ms).
- **mediaType**: `audio`, `vimeo`, `youtube`, or `unknown`.
- **eventType**: `play`, `pause`, `ended`, or `unknown`.
- **currentTime**: Playback position (seconds).
- **duration**: Total media duration (seconds).
- **mediald**: Identifier of the media item (unique within page).
- **url** (*optional*): Media URL if present.

events/g.csv — GymiTrainer events

- **timestamp**: Event timestamp (ms).
 - **event**: Numeric event code for chatbot interaction. (0 = open, 1 = close)
-

6. GymiTrainer (AI Chatbot)

gymitrainer.csv

- **id** (*index*): Thread identifier.
- **user_id**: Anonymised user identifier.
- **url**: Page URL where the conversation took place.
- **startTime**: Unix timestamp when the thread started (seconds).
- **content**: JSON array of message objects, each containing:
 - **text**: Message text (PII-redacted).
 - **gymitrainer**: Boolean — `true` if the message is from the AI, `false` if from the student.
 - **time**: Unix timestamp of the individual message (seconds).

gymitrainer_feedback.csv

- **id** (*index*): Feedback record identifier.
 - **thread_id**: Feedback record identifier (corresponds to `gymitrainer.csv`).
 - **score**: Numeric rating given by the user.
 - **comment**: Free-text feedback comment (PII-redacted; nullable).
-

7. Essay Results

essay_results.csv

- **result_id**: Unique submission identifier.
- **user_id**: Anonymised user identifier.
- **course**: Course ID (see above).
- **text_type**: Essay prompt type.
- **time**: Unix timestamp of submission (seconds).
- **text**: Submitted essay text (PII-redacted).
- **content__on_topic**: Score — whether the essay stays on topic.
- **content__plausible**: Score — plausibility of arguments.
- **content__convincing_ideas**: Score — strength of ideas.
- **content__scope**: Score — ratio of content to length.
- **content__correct**: Score — factual correctness and relevance (*Kurzzeitgymnasium only*).
- **structure__coherence**: Score — logical coherence.
- **structure__outline**: Score — quality of outline / structure.
- **structure__repetition**: Score — avoidance of repetition.
- **structure__text_pattern**: Score — adherence to text patterns.
- **language__clarity**: Score — vividness / clarity of expression.
- **language__spelling**: Score — grammar and orthography.
- **language__punctuation**: Score — punctuation correctness.
- **language__word_choice**: Score — appropriateness of vocabulary.
- **language__sentence_structure**: Score — sentence construction quality.
- **language__style**: Score — use of stylistic devices.

essay_feedback.csv

- **result_id**: Links to [essay_results.csv](#).
 - **feedback_rating**: Teacher's numeric rating of the AI feedback.
 - **feedback_text**: Teacher's written feedback.
 - **teacher_grade**: Teacher-assigned grade for the essay (according to student).
-

8. Text Comprehension

text_results.csv

- **user_id**: Anonymised user identifier.
- **course_id**: Course ID (see above).
- **exam_id**: Identifier of the exam.

- **session_id**: MongoDB ObjectId of the student's answer session.
- **question_id**: Composite key (**exam_id-question_index**) linking to **text_questions.csv**.
- **points**: Points obtained by the student.
- **max_points**: Maximum possible points.
- **answer**: The student's submitted answer text.
- **feedback**: Feedback on the answer. (computer generated)
- **timestamp**: Unix timestamp of submission (seconds).

Text_questions.csv (currently unavailable)

- (*index*): Composite key **exam_id-question_index**.
 - **exam_id**: Identifier of the exam.
 - **course_id**: Course ID.
 - **type**: Question type (e.g., **text, multiple choice**).
 - **max_points**: Maximum obtainable points.
 - **tags**: List of knowledge-component tags per question
-

9. Math Results (Math Exam Simulator)

math_results.csv

- **session_id**: id of the exam session.
- **question_part**: Zero-indexed sub-question number within a question.
- **user_id**: Anonymised user identifier.
- **question_id**: Identifier of the question (links to **math_questions.csv** index).
- **points**: Points obtained.
- **max_points**: Maximum possible points.
- **answer**: The student's submitted answer.
- **timestamp**: Unix timestamp (seconds).

math_questions.csv

- (*index*): Id of the question.
 - **course_id**: Course ID (**42** = lang, **3865** = kurz).
 - **year**: Exam year (e.g., 2023).
 - **tags**: List of knowledge-component tags per question (e.g., **Logik**, **Arithmetik**, **Geometrie**).
-

10. Quiz Results

Quiz_questions.csv (currently unavailable)

- **question_id**: Unique question identifier.
- **exam_id**: ID of the quiz the question belongs to.
- **metadata**: JSON object describe the rough structure and type of the exercise
- **tip_enabled**: **1** if a hint was enabled, **0** otherwise.
- **points**: Number of points for the question.

quiz_results.csv

- **session_id**: Statistic reference ID grouping one quiz attempt.
- **user_id**: Anonymised user identifier.
- **course_id**: Course the quiz belongs to.
- **quiz_id**: Identifier of the quiz.
- **question_id**: Links to [quiz_questions.csv](#).
- **points**: Points obtained.
- **max_points**: Maximum possible points.
- **time**: Unix timestamp of the attempt (seconds).
- **hint_count**: Number of hints used.
- **time_spent**: Time spent on the question (seconds).
- **correct**: **1** if answered correctly, **0** otherwise.

Note no quizzes are available for language courses.
